SUMMARY

Full Stack Developer experienced in building and deploying production-ready applications using Laravel, React.js, PHP, and RESTful APIs. Hands-on with the MERN stack and Docker. Skilled in MVC architecture. Passionate about clean code and robust full-stack engineering.

SKILLS

Languages : JavaScript (ES6+), PHP
Frontend : React.js, HTML5, CSS3, Tailwind CSS
Backend : Laravel, Node.js, Express.js, RESTful API Design, MVC Architecture
Database : PostgreSQL, MongoDB, MySQL
DevOps : Docker, Vercel
Tools : Git, GitHub, Postman

EXPERIENCE

NotionZoa

Mar. 2025 – Mar. 2026

Junior Software Intern

New Delhi

- Integrated Jira API to sync bug tickets raised by individual QA members, displaying each ticket under the respective member's name in the Coordinator dashboard.
- Created a Coordinator approval workflow where coordinators review each bug report and assign impact-based reward points, with rules to prevent duplicate approvals.
- Designed a QA Dashboard showing approved tickets and earned points, with a redemption flow where QA members raise reward withdrawal requests.
- Engineered a redemption management system in the Coordinator dashboard with approve/reject actions, coordinator remarks, and a full transaction history with timestamps generating a reference record for gift dispatch.
- Enforced secure RBAC for both dashboards with Laravel backend, PostgreSQL, and a fully responsive React.js and Tailwind CSS frontend.
- Tech Stack:** Laravel, PHP, PostgreSQL, React.js, REST API, JavaScript, Git, Tailwind CSS

PROJECTS

Bug Tracking, Rewards & Audit Management System | Laravel, React.js, PostgreSQL

Mar. 2025 – Aug. 2025

- Built dual dashboards for QA members and Coordinators with RBAC, secure login, bug approval workflow, and impact-based point assignment.
- Architected a full reward redemption flow with point validation, Coordinator approval/rejection, remarks, and complete transaction history as an audit trail.

MyResizer – All-in-One Image, PDF & ATS Resume Toolkit | React.js, Tailwind CSS

[Live](#) | [GitHub](#)

- Built a **100% client-side** web toolkit with 5 tools – Image Resizer, Image-to-PDF Converter, PDF Editor, ATS Resume Builder, and ATS Resume Checker – all processing files locally in the browser with **zero backend or data upload**.
- Implemented **advanced image resizing** with pixel/inch/cm unit conversion, DPI control, aspect ratio lock, target file size compression (KB/MB), and JPG/PNG format conversion using `browser-image-compression`.
- Built a **PDF Editor** using `pdf-lib` and `pdfjs-dist` supporting text annotation, highlights, freehand drawing, and page reorder/delete; and an **Image-to-PDF Converter** with multi-image upload, drag-and-drop reorder, and A4/Letter page size options.
- Developed an **ATS Resume Builder** with PDF/DOCX export via `jspdf` and `docx`, and a **simulated ATS Checker** with weighted scoring – keyword match (40%), section presence (30%), formatting (20%), and length (10%) – with actionable improvement suggestions.

EDUCATION

Sarala Birla University

Nov. 2021 – Feb. 2025

Bachelor of Computer Applications (BCA)

Ranchi, Jharkhand
